NOTICE TO ALL PLAN HOLDERS SUBMITTING BIDS FOR THIS WORK:

You are hereby notified of the following information, changes, clarifications or modifications to the original Contract Documents, Project Manual, Drawings, Specifications and subsequent Addenda. This Addendum shall supersede the original Contract Documents and previous Addenda wherein it contradicts the same and shall take precedence over anything to the contrary therein. All other conditions remain UNCHANGED.

CLARIFICATIONS AND CHANGES TO THE SPECIFICATION MANUAL AND DRAWINGS:

AD2.01: NOTICE TO CONTRACTORS (Advertisement)
DESCRIPTION OF WORK: Engineer's estimate of the Work is changed, the revised estimate of abatement and re-insulation is approximately $60,000.

AD2.02: PROJECT MANUAL
SECTION 02080; PARAGRAPH 1.01.B: Add new Work Item; paragraph
Revised as follows, in bold:
"The Scope of Work shall include removal of known asbestos-containing thermal system insulation (TSI) material on heating and domestic hot water piping in designated areas above the ceiling in the Diamond Physical Education Center and in the Fine Arts Building. TSI is to be removed from the following general locations:

1) Men's Locker Room:
   a) TSI located on 1.5" and 2.0" outside diameter (OD) domestic hot water piping above the men's locker room (equipment room, toweling room, shower room and rest room).

2) Women's Locker Room:
   a) TSI located on 2.5" OD domestic and 4" OD heating hot water piping above the women's locker room shower area.

3) Fine Arts Building, Room 3 (area below Main Theatre Seating)
   a) TSI located on 4.0"OD Chilled Water Supply and Return piping. Estimated total length is approximately 220 linear feet. [Refer New Sketch Drawings #SK-ASB-2.1, 2.2 and 2.3]
4) Fine Arts Building, Room 18
   a) TSI located on 1.0" OD heating hot water piping exposed on south wall adjacent to elevator vestibule. Estimated total length approximately 15 lineal feet. [Refer New Sketch Drawings #SK-ASB-2.1, 2.2 and 2.4]

AD2.03

GENERAL
Contractor shall install four (4) additional access openings at each of the existing ceiling/roof beam support locations in the Women’s Locker Room to provide access and facilitate removal of TSI and re-insulation activities within the beam cavities. At Contractor’s option, access opening(s) may be installed in the Men’s Locker Room to increase accessibility. Beams do not block reasonable continuous access as found in the Women’s Locker Room. New access doors and openings shall be sized as necessary and shall be equipped with latching mechanisms. Door and frame material and finish shall be suitable for damp locations. Submittal of product data required.

End of Addendum #2
January 18, 2006
